REMARKS

Claims 1-20. In the Final Office Action, Examiner Chen rejected pending claims 1-20 on various grounds. The Applicant has cancelled claims 1-20 herein. Withdrawal of the various rejections of claims 1-20 is therefore respectfully requested.

Claims 21-40. The Applicant respectfully asserts that new claims 21-40 are allowable over the art of record, because the art of record, fail to teach or suggest "wherein the driven element is separate and distinct from the at least one parasitic element" as recited in independent claims 21 and 34. In particular, U.S. Patent No. 6,326,922 to *Hegendoerfer* teaches the drive element 122 is part of a one-piece multi-element construction including driven element 122 and a combination 118 of a reflector and low-noise amplifier as evidenced by the common cross-hatching through elements 118 and 122 shown in FIG. 4, and fails to teach or suggest drive element 122 as being separate and distinct from the reflector. An allowance of claims 21-40 is therefore respectfully requested.

SUMMARY

Examiner Chen's rejections of claims 1-20 have been obviated by the cancellation herein of claims 1-20. The Applicant has supported an allowance of new claims 21-40 over the art of record, particularly *Hegendoerfer*. The Applicant respectfully submits that claims 21-40 as added herein fully satisfy the requirements of 35 U.S.C. §§ 102, 103 and 112. In view of the foregoing, favorable consideration and early passage to issue of the present application is respectfully requested. If any points remain in issue that may best be resolved through a personal or telephonic interview, Examiner Chen is respectfully requested to contact the undersigned at the telephone number listed below.
